CLAIMS 1-96 ARE PRESENTED FOR EXAMINATION

DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

Group I, claims 1-16, drawn to a method for diminishing, inhibiting or eliminating addiction-related behavior of a mammal.

Group II, claims 17-31, drawn to a method for diminishing, inhibiting or eliminating cravings associated with addiction to drugs in a mammal.

Group III, claims 32-46, drawn to a method for diminishing, inhibiting or eliminating rewarding/incentive effects in a mammal..

Group IV, claims 47-61, drawn to a method for diminishing, inhibiting or eliminating dependency characteristics associate with addiction to drugs of abuse in a mammal.

Group V, claims 62-77, drawn to a method for preventing addiction to drugs of abuse in a mammal.

Claims 77-96 will be examined with the elected species.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 17, 32,47 and 62 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims

Art Unit: 1617

readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Further restriction may be required.

No telephone communication was made on this restriction requirement because the restriction is complex. (MPEP 812.01).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Theodore J. Criares whose telephone number is 308-4607. The examiner can normally be reached on 6:30 A.M. to 5:00P.M. Monday through Thursday.
